

Technical Requirements

Handstand - 24" canes

Duration: 5-6:30 min

I require an open space that leaves me room to warm up. It is important that the performance area have a level floor. I need a minimum of 2 hours for warm up, and at least 15 minutes in the performance area prior to the performance to check lighting and sound. The music is available as a MP3 file. For the performance, I am capable of placing my apparatus myself, but if needed it can be set up generally by two people. If it is requested to have others set up the apparatus, I will need a 10 minute briefing with them prior to the performance.

Inform me if any of the conditions conflict with the requirements I have listed. Depending on the situation, adaptations can be made.

with the requirements I have listed. Depending on the situation,
